- Concepts covered included regression analysis, design of experiments, and probability

PROJECTS

Corporate Migration in the Financial Industry: Where to Next? [Link to Demo](#)

DataFest 2025 Best Visualization winning presentation. Used corporate real estate records to assess migration patterns in the financial industry and presented via slide deck to a panel of judges and peers. Identified Nashville, Tennessee as a top emerging market.

UltraCondor ETF Financial Product Proposal [Link to Demo](#)

Designed and backtested a structured financial product aligned with CalPERS constraints. Modeled risk-return tradeoffs using an Iron Condor options strategy, achieving 15% greater annualized returns than SPY during backtesting. Presented results with focus on risk-adjusted performance and financial implications.
