ACTUARIAL EXAMS

SOA Exam P – Passed July 2024

SOA Exam FM – Passed December 2025

CAS Exam MAS-I – Scheduled April 2027

EDUCATION

Master of Science in Statistics, California Polytechnic State University June 2026

Bachelor of Science in Statistics, California Polytechnic State University June 2026

SKILLS

Programming: Excel, PostgreSQL, R (tidyverse), Python (Pandas), Tableau

Statistics: Stochastic Processes, Generalized Linear Models, Time Series Analysis

Finance: Life Contingencies, Loss Models, Hazard Rates

EXPERIENCE

Catering Assistant, California Polytechnic State University Sep 2022 - May 2026

- Collaborated with teams of 10-20 staff to serve 150+ guests during high-volume events. Assisted chefs and catering captains in fulfilling ad-hoc client requests.

Undergraduate Research Assistant, California Polytechnic State U. Dec 2024 - Feb 2025

- Developed linear regression models in R using survey data to identify significant drivers of environmental knowledge among hikers on the Pacific Crest Trail.
- Published in the Environmental Education Research academic journal.

Instructional Student Assistant, California Polytechnic State U. Dec 2023 - Dec 2024

- Evaluated assignments and supported improvement for 120+ students across four undergraduate and graduate statistics courses covering regression analysis, experimental design, and probability.
- Collected student performance data for professors using the Canvas Learning Management System.

PROJECTS

MeaslesMapR R Package [Link to Demo](#)

Developed an R package implementing data cleaning, aggregation, and visualization pipelines for global measles case data. Created a dashboard with Shiny and integrated gganimate, facilitating interactive analysis of outbreak trends across socioeconomic factors.

UltraCondor ETF Financial Product Proposal [Link to Demo](#)

Backtested an Iron Condor strategy in Excel using historical market data with CalPERS' specific investment constraints, evaluating returns and risk-adjusted performance against an SPY benchmark. Generated 15% higher annualized returns than benchmark.

Diabetes & Pancreas Transplant Waitlist Outcomes [Link to Demo](#)

Cleaned, aggregated, and visualized multiple partially redacted clinical datasets. Developed a random forest model using tidymodels in R to classify patients with diabetes with pre-visit questionnaires, as well as to predict mortality for transplant patients. Achieved 86% recall for true diabetes patients and predicted mortality with 80% accuracy.
